------------	--------------------------	--------------------	-------------------

<b>306m</b> Fence Installed	<b>10 Days</b> Completion Time	<b>USD 30,000</b> Contract Value	<b>2026</b> Year Completed
--------------------------------	-----------------------------------	-------------------------------------	-------------------------------

## PROJECT DETAILS

<b>Client:</b>	Trademark Africa / Ministry of Finance & National Planning	<b>Scope:</b>	306m clear-view perimeter security fence
<b>Location:</b>	Nakonde, Muchinga Province, Zambia	<b>Specification</b>	577 High Secure — 12.7mm x 76mm aperture
<b>Bolide Role:</b>	Main Contractor	<b>Duration:</b>	10 working days

## BACKGROUND

The Nakonde One Stop Border Post (OSBP) on the Zambia/Tanzania border is a critical trade and customs facility managed under the Trademark Africa programme and funded by the Ministry of Finance and National Planning. The border post required an urgent upgrade to its perimeter security to meet international standards for border infrastructure.

## SCOPE OF WORK

Bolide Infrastructure Solutions was engaged as the main contractor to supply and install 306 linear metres of 577 High Secure clear-view fencing — the most robust specification in the clear-view range, with a 12.7mm x 76mm aperture designed specifically for anti-climb, high-security applications. The scope included all posts, concrete footings, panels, fasteners and site clearance.

## DELIVERY

The project was completed in 10 working days from mobilisation to handover — a demanding timeline for a remote provincial site requiring significant logistics coordination. Materials were transported from Lusaka to Nakonde, a distance of over 900km, with all site accommodation and logistics managed by the Bolide team.

## OUTCOME

The fencing was completed and handed over to the satisfaction of the client engineer, Killian Bboloka of Trademark Africa. A formal project completion certificate was issued confirming that works were carried out to the agreed specifications and handed over in good condition.

*"This is to certify that Bolide Infrastructure Solutions Limited successfully completed the supply and installation of the security fence at Nakonde One Stop Border Post in accordance with the agreed specifications. The works were completed to a satisfactory standard and handed over in good condition."*

Killian Bboloka, Site Engineer — Trademark Africa / Ministry of Finance & National Planning

## KEY PROJECT FACTS
